ABOUT ME

I love discovering new things.

I believe that "the less you do, the less you'd do"
and this is why I am always active,
trying to improve myself, pushed by a constant curiosity.

My international experience and education
enriched my graphic knowledge, for web and print,
and increased my awareness of it
as a powerful mean of communication,
essential within a very competitive digital reality.

After a Master in coding I embraced
a career in Front End Development.

 Bergamo, Italy 16/01/1989
